

ENC 62-432  
4 June 1962

CONFIDENTIAL

TO : Chairman, Equipment Board  
FROM : Chief, OC-E  
SUBJECT: R and D Program for FY 1963-1964

1. Forwarded as Attachment A is the FY 1963-1964 Office of Communications R and D Program, recommended by the Research and Development Branch of this Staff. These recommendations are based on known and anticipated technical progress, as related to operational requirements evolved through discussions with other OC Staffs. The format differs slightly from that previously used -- the intent being to submit a functional plan oriented toward missions rather than toward equipment. Additional explanatory information, useful for background purposes, is forwarded as Attachment B.

2. It is noteworthy that several of our past and current equipment development programs have had an impact on the military R and D effort. A summary of our recent military liaison in this area is furnished as Attachment C.

3. The budget presentation also includes a section devoted to the internal laboratory program in order to give a full view of the total OC/R and D effort.

25X1A

Attachments as noted.
